EDUCATION

B.Tech., Computer Science Engineering (AI Specialization) — Bennett University, Greater Noida. CGPA 8.0 2023 – 2027

EXPERIENCE

Full Stack Developer Intern — Lit India Pvt. Ltd.

June 2025 - July 2025

- Participated in the complete SDLC — from requirements gathering to deployment — gaining hands-on exposure to production-grade engineering workflows.
- Built and integrated software features using React, Node.js, and Express, collaborating closely with the team to ensure alignment with project requirements and system reliability.
- Containerised services using Docker, reducing environment inconsistencies across development and staging.
- Debugged and resolved application-level issues, improving system stability and code quality.

PROJECTS

Enterprise RAG + Agentic Assistant

Python, FastAPI, LangGraph, PostgreSQL/pgvector, Docker

- Designed an agentic LangGraph pipeline routing queries across document QA, NL-to-SQL, and tool-based actions, with a swappable LLM provider layer (OpenAI vs. local Ollama) for controlled experimentation.
- Built a 49-test offline evaluation suite to rigorously measure system accuracy, safety, and reliability.
- Implemented prompt-injection guardrails, a self-critique verification step, and a human-in-the-loop approval flow for high-risk actions.
- Built hybrid retrieval infrastructure (vector + full-text via RRF fusion) and containerised the full stack with Docker Compose.

AI Meeting Assistant Bot

React, Node.js, MongoDB, Python, Playwright, WhisperX

- Engineered a full-stack, multi-service AI system (React, Node.js/Express, MongoDB, Python microservice) with real-time transcription and speaker diarization (WhisperX, pyannote.audio).
- Built browser automation (Playwright) that auto-joins and operates across Google Meet, Zoom, and Microsoft Teams, handling platform detection, session management, and failure recovery.
- Shipped an AI-driven chatbot layer for real-time meeting assistance using speech-to-text and diarization to generate contextual responses.

AI Virtual Mouse & Gesture Keyboard

Python, OpenCV, MediaPipe, PyAutoGUI, pynput

- Built a real-time hand-gesture control system using MediaPipe hand-landmark tracking, supporting cursor movement, left/right click, scroll, zoom, and drag-and-drop.
- Designed a custom gesture state machine with debouncing and hysteresis to prevent misfires, and calibrated gesture thresholds relative to hand geometry (instead of fixed pixel values) for robustness across hand sizes and camera distances.
- Extended the system with a gesture-driven virtual keyboard supporting both dwell-time and pinch-to-confirm typing modes.

Radhey Girls PG — Business Website & Local SEO

HTML, CSS, JavaScript

- Designed, built, and deployed a live production website (radheygirlspg.in) for a family-run PG accommodation business, owning the project end-to-end: domain, hosting, deployment, and local SEO setup.

SKILLS

Programming: Python (primary), JavaScript, Java, C++, SQL, Git

AI/ML: LangGraph, RAG, LLM Integration, Prompt Engineering, Evaluation Methodology, Computer Vision (OpenCV, MediaPipe), Deep Learning & Neural Networks (coursework)

Systems & Infra: FastAPI, Docker, PostgreSQL/pgvector, MongoDB, REST APIs, AWS

Web Development: React, Node.js, Express, Full-Stack Development, SEO

Engineering Practices: Rigorous Testing & Evaluation, Debugging Complex Systems, Technical Documentation
