EDUCATION

B.Tech., Computer Science Engineering — Bennett University, Greater Noida. CGPA 8.0 2023 – 2027

EXPERIENCE

Full Stack Developer Intern — Lit India Pvt. Ltd.

June 2025 - July 2025

- Contributed to a production React, Node.js, and Express codebase during a focused SDLC onboarding sprint, covering feature development through deployment.
- Debugged and resolved application-level issues identified during the sprint, improving code quality and stability.
- Containerized services using Docker to reduce environment inconsistencies between development and staging.

PROJECTS

AI Meeting Assistant Bot

React, Node.js, MongoDB, Python, Playwright, WhisperX

- Automated end-to-end meeting intelligence extraction across [3] platforms by engineering a bot that joins meetings, captures audio, and generates structured summaries, action items, and tickets.
- Eliminated manual meeting note-taking by implementing Playwright-based browser automation for Google Meet, Zoom, and Microsoft Teams, including platform detection and session handling.
- Delivered speaker-attributed transcripts in near real time by integrating WhisperX transcription with pyannote.audio diarization into a full-stack pipeline (React dashboard, Node.js/Express APIs, MongoDB, Python microservice).

Enterprise RAG + Agentic Assistant

Python, FastAPI, LangGraph, PostgreSQL/pgvector, Docker

- Validated system accuracy and reliability across a 49-test offline suite by building a production-style RAG system with hybrid retrieval (vector + full-text via RRF fusion).
- Reduced hallucinated and unsafe responses by implementing prompt-injection guardrails, a self-critique verification step, and a human-in-the-loop approval flow for high-risk actions.
- Enabled zero-downtime LLM provider switching by containerizing the full stack with Docker Compose and a swappable OpenAI/Ollama provider layer, routing queries across document QA, NL-to-SQL, and tool-based actions via LangGraph.

SKILLS

AI/ML: LangGraph, RAG, Prompt Engineering, WhisperX, LLM Integration, Agentic Pipelines, Neural Networks

Languages: Python, Java, C++, R, SQL, Git

Backend / DevOps: Node.js, Express, FastAPI, Docker, Linux, AWS, REST APIs, WebSockets

Frontend: React, HTML/CSS, UI Component Development

Data / DB: PostgreSQL/pgvector, MongoDB, SQLite3, SQL (CRUD), Database Schema Design

CERTIFICATIONS

- Artificial Intelligence with Python — Coincent AI
- Neural Networks and Deep Learning — Coursera
- CS403: Introduction to Modern Database Systems — Saylor Academy
- Object-Oriented Data Structures in C++ — University of Illinois
- MATLAB Programming Techniques — MathWorks
- Digital Electronics — Infosys

ACHIEVEMENTS & ACTIVITIES

- Bennovate 3.0 Ideathon — Presented an entrepreneurial solution for travel agency management as part of Team Wizar.
